

What are the touchstones of a Touchstone Energy Cooperative?

Integrity:

Just like you work hard in school, we have a job to do. We do it well! When we make a mistake, we own up to it. We want to make it right. We want to be honest.

Integrity.

Accountability:

Knowing what happens to a company's money is called accountability. Accountability goes beyond money matters, however, because we also take very seriously our responsibility to do our job well.

Accountability.
